

JOINT INTERNATIONAL ONCOLOGY CONGRESS

5th Symposium on Cancer Metastasis and the Lymphovascular System and the

8th International Sentinel Node Society Congress

Monday, May 27 – Wednesday, May 29, 2013 Hilton San Francisco Financial District - San Francisco, California

Updates in our understanding of cancer metastases, especially sentinel lymph node biopsy concepts and technology, the cancer microenvironment, and the molecular mechanisms involved in the progression of cancer cells to metastasis will be discussed by an internationally renowned faculty. New developments in biomarker research and their diagnostic and prognostic applications in metastatic disease will be highlighted. New targeted therapy against cancer biomarkers will be featured.

Co-Chairs

8th International Sentinel Node Society Congress (ISNS)
Armando E. Giuliano, MD, FACS
President, International Sentinel Node Society
Executive Vice Chair, Surgery

Associate Director, Surgical Oncology

Cedars-Sinai Medical Center

Los Angeles, CA

5th International Symposium on Cancer Metastasis and the Lymphovascular System Stanley P. L. Leong, MD, FACS

President, Sentinel Node Oncology Foundation
Chief of Cutaneous Oncology
California Pacific Medical Center and Sutter Pacific Medical Foundation
San Francisco, CA

Presented by California Pacific Medical Center, a Sutter Health Affiliate, Cedars-Sinai Medical Center,

The International Sentinel Node Society, Sentinel Node Oncology Foundation, and The Academy for Continued Healthcare Learning.
